AS Levels: French (A), Art (A)

GCSEs: 11\*s including: Maths, Chemistry, Physics, Biology, English Language and English Literature.

FMSQ (A)

---

#### Tutoring Experience

I spent four years tutoring before university alongside my GCSEs and A Levels, and helped a total of ten students through their own GCSEs and A Levels in Maths and Sciences. I have been tutoring online since graduating, helping pupils disadvantaged by the pandemic, primarily helping students through their Maths GCSEs. I really enjoy the process of tackling difficult problems with my pupils, using my knowledge both from my school exams, and my degree. I have worked very hard to refine my revision and learning strategies, which I love sharing with my pupils.

---

#### Testimonials

"Lara tutored my son Philipp for two years, she coached him through KS2 and KS3 by spending an hour a week with him on term time weekends. Philipp benefited greatly from her assistance, and went from scoring 45% in a Maths test to 93% a month later. She was friendly and patient, and always happy to help wherever needed" - (Helena, parent of student)

#### Tuition Approach

I've recently graduated from Cambridge with a Masters in Natural Sciences. I have experience in tutoring Maths and Sciences, and can help with Maths, Physics and Chemistry up to A Level, and Biology up to GCSE. As a tutor I am happy to provide any help you may need; whether it's going through homework, providing extra support with different classroom topics, or revision assistance. I tailor my approach to a student's needs, with a focus on tackling exam questions in Maths and understanding the key ideas in the sciences.
